

Going Green?

Don't forget your packaging.

For years, Mark-Pack has been helping its customers achieve their sustainability goals with our responsible product mixture. We currently offer the following eco-friendly products:

- ◆ Biodegradable polystyrene loose fill.
- ◆ Oxy-degradable polyolefin shrink film.
- ◆ Source reduction stretch film.
- ◆ Recycled poly bags and tubing.
- ◆ Biodegradable and reusable Ranpak paper.
- ◆ “SFI” (Sustainable Forestry Initiative) corrugated cases.
- ◆ Source reduction angle board.
- ◆ Polyester strapping recycling program.
- ◆ Earth friendly cleaning supplies.

Mark-Pack also carries “green” equipment as well, including:

- ◆ Foxjet print & apply systems (all-electric operation to eliminate wasted plant air).
- ◆ Hitachi small character ink jet printers (reduced hazardous raw materials to meet RoHS directive, eco-friendly inks, unique ink return system to reduce fluids usage).

In addition to offering these products, Mark-Pack, Inc. has initiated our own sustainability program at our facility. By recycling our office paper, plastic, steel and corrugated, we have cut our trash pick-up by more than 80%. We have cut our electric and gas usage. And we are currently in the process of going completely paperless.

Give us a call today for a free packaging audit. We look forward to helping you achieve your sustainability goals.
