

500-7/8 PNEUMATIC CARTON CLOSER

Applications: Box Closing, Displays, Packaging

Similar to: JK 560-22, ISM AB100A7/8

This very durable tool is designed to close corrugated cardboard boxes. It is the tool of choice when high speed and efficiency are required. Each ASC carton closer has separate adjustments for depth of drive and tightness of clinch. These adjustments afford the ability to perform both blind and through clinching. Light construction and good balance reduce operator fatigue. This model takes a longer staple than other carton closers.
