

MARSH®

Marsh Shipping Supply Co., LLC

PRODUCT GUIDE

Quality, reliability, value...this is what you can expect when you buy Marsh products. Purchasing Marsh products from a Marsh Shipping Supply Company LLC distributor guarantees you are getting the "best in the business".

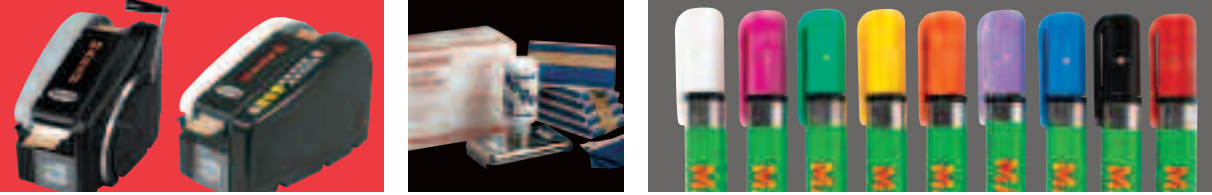

Each Marsh product is designed and engineered to give consistent, dependable performance. From the raw material selection to the final packaging, care is taken to ensure that you get the very best stenciling, carton closing, coding, and marking products available.

Marsh Shipping Supply Company, LLC is represented across the globe by a select group of independently owned and operated distributors. With over 50 distributors located in the U.S., and 72 international distributors, we are sure to have one near you.

Marsh products are manufactured to the highest quality standards and sold at a competitively fair price. We back our products with an extensive warranty, along with distributor and factory support long after the product was purchased.

Throughout these pages you will find the solution to your packaging and coding needs. Please browse through the pages...and then make a good decision to contact your local Marsh distributor.

For the location and number of the Marsh distributor nearest to you, please call us at 800.854.8905 or 618.343.1006.

We will further explore new and innovative equipment to economically and efficiently improve the shipping operations of our current and future customers.

STENCIL MACHINES

Marsh Hand Operated Stencil Machines – When it comes to stenciling product identification, shipping information, or other valuable information that requires a clear, long-lasting permanent legible mark, Marsh stenciling products stand up to the task. Combine the stencil machine along with the superb quality oilboard, inks, and applicators, and you can be sure you have a “system” that will meet your coding needs.

FEATURES:

- Punch and Die – case hardened dies have wear resistant cutting edges. Alloy punch is stronger, lasts longer than steel. Fits closer, cuts cleaner and is more corrosion resistant.
- Aluminum Rotating Parts – lightweight for faster, smoother operation
- Clean Hand Wheel – no spokes or lugs to interfere with hand
- Durable Finish – baked on powder coat industrial black finish
- Sealed-In Lubrication – parts rotating on center spindle “ride on oil” from impregnated felt rings in base of machine
- Large Dial – easy to read
- Word Space Button and Release Lever and Button – for quicker, neater, easier stencil cutting
- Accurate Spacing – simple cam and ratchet spaces automatically
- Quick, Shock-Free Centering – makes character selection smoother and easier
- Rubber Base Mounts – smooth, soft feel to cutting operation
- Lubricated Punch Shanks – felt rings impregnated with oil, on all 40 punch shanks, provide years of self-lubrication and reduce operating sound
- 18 month limited warranty

STENCILS

STENCIL EXPRESS

The Marsh Stencil Express is an electronic stencil cutting system that is computer driven with state of the art software designed specifically to meet your customers varied stenciling requirements. The software program is designed to run directly from your existing PC and does not require a stand alone dedicated PC system. All that is required for the software is one of the following programs: Windows 95, 98, ME, 2000 or XP.

With the Marsh Stencil Express system you can cut .011 oilboard, polyethylene, sandblast, stencil mask, vinyl, magnetic and other materials.

Unlike other systems on the market, the easy to use software program will allow you to start cutting a variety of styles and sizes of stencils in a matter of minutes without the need of lengthy, specialized training.

System Includes: 24" cutter, stencil and decal software and manual, cables, 1 – 45 deg. blade, and table top mounting brackets and cradle. Optional stand is available.

SOFTWARE FEATURES INCLUDE:

- Multiple line cutting
- Left, center, or Right Justification
- Rotating Text (Cuts in Any Direction)
- Space adjustment between characters
- Cuts stencils in arc format
- Save/Name stencil files
- Runs directly from your existing PC.
Does not require a stand alone dedicated PC system
- Works with Windows 95, 98, ME, 200, XP
- Over 48 Stencil, Military Font, and 19 International Caution Marking Symbols

HARDWARE FEATURES INCLUDE:

- Heavy duty cutting bed
- Uses up to 24" wide cutting material. Most material comes in rolls and mounts on the machine cradle for easy unwind during the cutting process.
- Knife force up to 400 grams
- Digital servo drive
- Repeat function and easy to use keypad, includes test cut feature, adjustable dial for calibrating the blade cutting force and cutting speed. Repeat job button and start/stop button.
- Easily replaceable blades
- 110 or 220 volt power supply (auto sensing)

Using Stencil Express makes standard and special applications quick and easy.

Remember to order the Marsh Stencil Applicators when ordering your Stencil Express.

Both standard Marsh Fountain Brushes and Rollers along with our new Rolmark Express are available from your local Marsh distributor. Use Marsh brand stencil inks to insure a good mark.

OILBOARD

In addition to superior stencil machines, Marsh Shipping Supply Co., LLC offers exceptionally high-quality oil treated paper board. Marsh oilboard is cured in a plant that is solely dedicated to the production of superior grade oilboard. Marsh oilboard is treated with a special blend of triple-boiled linseed oils to resist ink bleed-through. After treatment with the oil, the board is cut with the grain in order to further strengthen its rigidity. This whole process provides you with clean, sharp marks with your stenciling system (stencil machine, ink, applicator, oilboard). Further, the high absorption of oil in the board, self-lubricates the punches of your stencil machine to extend the life of the machine.

FEATURES:

Specially formulated to resist ink bleed-through

Fine grade oilboard will not tear or pull when cut – saves you time and money

The largest selection of standard sizes available for all types of stencil machines

Character:	¼"	½"	¾"	1"
Height:	6.35mm	12.7mm	19mm	25.4mm

Standard Sizes
.015" Thick – Recommended for 1", 3/4", 1/2" machines

Other special cut sizes and rolls available.
Please call for pricing and availability.

Lightweight, .007" Thick – must use with 1/4" machines

All of the sizes indicated above are also available in .007 and .011 thickness. Item codes for .007 are prefaced with OB7
.007 oilboard is not available in canary. Item codes for .011 are prefaced with OB11 (natural); OBC11 (canary).

INDUSTRIAL SPRAY PRODUCTS

SPRAY STENCIL INKS

- Spray Stencil Inks are useful for permanent, waterproof, fast-drying bold marks on any surface. Marsh Spray Inks are lead free, CFC and CFHC-Free. All inks formulations comply with CONEG legislation.
- Standard Highly Visible Colors: Black, Blue, Green, Orange, Red, White and Yellow
- Packed in 14 fluid ounce (414 cm) cans – Net weight 11 oz (.31 kg)
- Meets Government performance requirement for specification CID A-A-208B

SPRAY MARK OVER, TAN

- Tan Spray Mark Over sprays on any surface to cover old marks and re-use cartons. This fast drying, permanent, and waterproof mark over will provide maximum coverage with minimum spray mist and running.
- Packed in 14 fluid ounce (414 cm) cans – Net weight 11 oz. (.31 kg)

SPRAY ADHESIVE

- All purpose, no mess, high contact spray adhesive that forms a permanent bond on most materials.
- Packed in 21 fluid ounce (621 cm) cans – Net Weight 14 oz (.4 kgs)

SPRAY SILICONE

- Food grade spray waterproofs, prevents rust, and stops squeaks. Use Spray Silicone to lubricate and reduce friction on moving parts and to prevent build-up of glues, inks, dirt, and wax.
- Net Weight 10 oz (.28 kg)

STENCIL PRODUCTS

FOUNTAIN ROLLERS

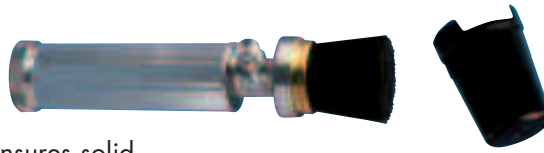

- The pump action of Marsh Fountain Rollers give you fast, uniform ink dispensing without fading or flooding.
- Rolmark Fountain Roller – Use RFR200 in 1 1/2" (3.8 cm) and 3" (7.5 cm) sizes on porous or non-porous surfaces with Marsh Rolmark and Poly Rolmark Inks.
- Fountain Roller – Use FR100 in 1 1/2" (3.8cm) and 3" (7.5 cm) sizes on porous surfaces only with Marsh K Ink.

FEATURES:

- Durable aluminum and brass construction for tough environments.
- Long wearing neoprene roller.
- Environmentally friendly – refill from Marsh quart or gallon ink cans and reduce packaging waste.
- Replacement rollers available.

FOUNTAIN BRUSH

The Marsh Fountain Brush ensures solid stencil coverage and strong clear marks. Great for uneven surfaces, such as crates, or concrete.

FEATURES:

- No-mess operation – ink refill is at the handle end of the brush.
- Extend product life with replaceable brush tips.
- Use brushes for porous and non-porous applications with the appropriate ink.
- Includes polypropylene cap to protect bristles.
- Use with K or Rolmark ink.

W-15 WATER BASE, TAN MARK OVER

W-15 mark over ink obliterates old marks on tan colored porous surfaces. Fast-drying, permanent, waterproof – marks on any surface. Use with the following products:

- Standard paint brush
- Paint Roller
- Spray Gun
- For W-15 clean-up, use water

ITEM CODE

W15-T-G.....W-15 Tan Mark Over, Gallon (water base)

DESCRIPTION

(Premium Model Shown)

Feeling a little insecure about your current carton closure system? Do you want to be sure your valuable goods arrive safely and intact at the final destination? You bet you do!

Marsh Tape Machines can provide the security you are looking for by dispensing gummed tape quickly and efficiently. All Marsh Tape Machines measure, dispense, moisten, and cut the tape in a variety of lengths. Marsh Tapers and water activated tape provide not only the most secure carton closure, but also a tamper-evident, completely recyclable seal.

Marsh Tape Machines have over 50 years of proven reliability in the tape machine industry worldwide.

The new Marsh TD2100 Tape Machines are available in several different models. One of these models will certainly address your packaging requirements. Each model offers a variety of features to meet your needs, but all models provide the following standard features –

- ALL METAL UNI-BODY CHASSIS CONSTRUCTION.
- LONG LASTING, HIGH STRENGTH PBT ENCLOSURE
- LARGEST WATER BOTTLE IN THE INDUSTRY!
70 ounce bottle increases production “up-time” with fewer refills
- BUILT-IN, ALL METAL ADJUSTABLE TAPE GUIDES
Maintains tape roll for smooth tape flow and accurate cutting and less jamming.
- “APEX” DESIGN GUILLOTINE STYLE CUTTER
420HC stainless steel, provides long life and requires little adjustment.
- 1,000 FOOT ROLL TAPE CAPACITY
- LIMITED 18 MONTH WARRANTY
- **WITH THE LARGEST WATER BOTTLE AND LARGEST TAPE ROLL CAPACITY IN THE INDUSTRY - KEEP YOUR DOWNTIME TO A MINIMUM**

MADE IN USA

TAPE

TD2100 ELECTRIC TAPER

Marsh TD2100 Electric – seal your carton effectively and efficiently!

The new Marsh TD2100 Electric Tape Dispenser and water activated tape are the perfect match for a tamper evident, recyclable seal. The all new, state-of-the-art, electronically driven, TD2100 Electric tape dispenser was designed with ease of operation and dependability in mind. TD2100 Electric – new design, but rest assured, has the same Marsh quality known for decades in the tape machine industry.

The all new TD2100 Electric is available in 3 models to meet your specific carton closure needs – standard, premium short, and premium long. All models feature a tactile keypad with programmable repeat keys for short and long tape lengths. Ideal for sealing same size cartons! Random/Continuous feature built in, LCD display of programmed lengths.

Standard model has 20 pre-set selectable lengths with use of the shift key.

Premium models not only offer 10 pre-set selectable lengths, but with the use of the “num lock” key provides option to input custom lengths ranging from 5” to 99” – 1” increments.

Options include a tape coder that prints text, logos, date codes, etc., in one easy operation, and 2-selection foot pedal.

SPECIFICATIONS:

- Tape – paper or reinforced gummed tape – up to 1,000 foot (304.8m) long roll
Maximum roll diameter – 9” (22.26 cm)
- Tape Widths Accepted – 1 inch (2.5cm) to 3 inch (7.6cm)
- Tape Lengths Dispensed – 5 inch (12.7cm) to 90 inch (228cm) - continuous feed feature for longer lengths
- Water Bottle – 70 ounces (2.07 liters)
- Shipping Weight – 35 lbs (15.9 kgs)
- Dimensions – 18.9” L x 10.5” W x 13.7” H (48 cm L x 26.6 cm W x 34.8 cm H)
- Electrical – 110/120 volts 50/60 hertz, 4 amps; 220/240 volts 50/60 hertz, 2 amps
Power Cord – 7 feet (2.3m)

FEATURES:

- TD2100 Microprocessor designed for fast, efficient operation – eliminates unnecessary tape waste – dispenses tape 3’ (91cm) per second
- Superior Moistening System – constant hot water and the flow through brush system activates the glue quickly and evenly the whole length of the tape. This method is far superior to applying heat from the top and through the insulated tape.
- Portable – the TD2100 is lightweight, yet strong enough to move to other work areas when needed.
- Durable – all components, inside and out, are proven to last even in some of the most harsh environments. Electronic components are designed for maintenance free operation.
- Quality Engineered – conforms to ANSI/UL Std.60950-1, 1st Ed., Certified to CAN/CSA C22.2 no. 60950-1-03, 1st Ed., CE certified to standard IEC/EN 60950-1: 2001, 1st Ed

BEAUTY ON THE OUTSIDE...

BEAST ON THE INSIDE.

Heavy gauge steel and unibody chassis provides the structural strength of the machine and precision mounting points for all stationary and moveable components.

TD2100 HAND TAPER

SPECIFICATIONS:

- Tape – paper or reinforced – up to 1000' roll
- Tape Widths – 1 inch (2.5cm) to 3 inch (7.6 cm)
- Tape Lengths – 5 inches (12.7cm) to 36 inches (91.4cm)
- Water Tank – 70 ounces (2.07 liters)
- Shipping Weight: 31 lbs (14.1 kgs)
- Dimensions: 18.9" L x 13.7" H x 10.5" W (48 cm L x 34.8 cm H x 26.6 cm W)
- Electrical (for heater models): 110/120 volts, 50/60 hertz 220/240 volts, 50,60 hertz

FEATURES:

- Portable, yet sturdy, for easy use and maintenance!
- Easy-pull handle for variable tape lengths: 5"(12.7cm) to 36"(91.4cm) in a single pull.
- "APEX" design guillotine style cutter
- Largest water bottle in the industry – 70 oz (2.07L)
- Easy on the operator – drop-in tape loading and the easy-pull, snap-back handle for timely, no hassle operation.
- Optional heater models with flow-through brush system provide high-tack tape adhesion in unheated environments.

NATIONAL PACKAGE SEALING
A Division of Marsh Shipping Supply Co LLC

These products are among those now offered by National Package Sealing - A Division of Marsh Shipping Supply Company LLC. Please see the complete NPS catalog for all products and information.

WATER ACTIVATED TAPE DISPENSERS

98TM - TOUCH-MATIC TAY-PER®

Features include 12 pre-set lengths from 6" to 39", plus RANDOM button for longer lengths. The REPEAT feature dispenses the last selected length again. Dispenses tape from 1" to 4" wide.

52 - MANUAL TAY-PER®

Features include independent stop for 2 different lengths of tape, positive moistening with double brushes and adjustable pressure control. Dispenses tape from 1" to 4" wide.

PRESSURE SENSITIVE TAPE DISPENSERS

150 - TAPEMATE II - PRESSURE SENSITIVE TAPE DISPENSER

Automatically feeds, measures, and cuts lengths of pressure-sensitive tape from 1" to 99" long. Dispensing speed is adjustable from 1"/sec. to 5"/sec. Power feed forward and reverse for easy loading and unloading.

112 - TAPEMATE - PRESSURE SENSITIVE TAPE DISPENSER

For short lengths of PVC, masking, reinforced, and other pressure-sensitive industrial tapes. Has manual, automatic, and random operating modes. Serrated blade. 112A Model also available with shear blade-hand pull lever

902 CARTON SEALER

FEATURES:

- Rigid, deep-formed steel frame with tough baked finish.
- Much more durable than low priced "promotional" dispensers.
- Replaceable precision blades easily cut poly and reinforced tapes to 2" wide.
- Oversized adjustable brake for exact tension control.
- Spring action holds flap open for loading, then snaps shut for use.
- Handles tapes up to 5 1/2" dia. (220 yard rolls).

903 CARTON SEALER

- Identical to 902, but for 3" wide tapes.

914 HAND-HELD DISPENSER (1" WIDE)

915 HAND-HELD DISPENSER (2" WIDE)

FEATURES:

- Efficient alternative to conventional "pistol grip" dispensers.
- Attractive housing has fusion bonded finish. Fully encloses tape for protection from dirty environments.
- Comfortable hand fit improves taping control. Ideal for double-faced tape when backing is to be removed later.
- Accepts tape rolls up to 4 3/4" dia. (110 yards).

922 BENCH DISPENSER

FEATURES:

- Practically indestructible, with coated steel frame.
- Replaceable serrated blade cuts all non-reinforced tapes quickly and cleanly.
- Non-slip rubber facing on bottom.
- Has two holes for permanently mounting on work bench.
- Weighs 3 lbs. Maximum roll dia. 5 1/2" (220 yards).

933 BENCH DISPENSER FEATURES:

- Same, but for 3" wide tapes. Weighs 4 lbs.

944 BENCH DISPENSER FEATURES:

- Same, but for 4" wide tapes. Weighs 5 lbs.

924 4-ROLL DISPENSER

FEATURES:

- Welded steel frame for stability and long life.
- Designed to hold up to 4 assorted tapes up to 1" wide, with staggered cutter heights for convenient tape access.
- Non-skid rubber base protects work surfaces. Cutting blades are easily replaceable.
- Weighs 9 lbs. 5½" wide x 10" long.
- Accepts tape rolls to 6" dia. on standard 3" cores.

925 DOUBLE-FACE HAND HELD TAPE DISPENSER

FEATURES:

- Automatically separates and rewinds the backing strip as the tape is applied.
- Heavy formed-steel frame.
- Independent, adjustable brakes on tape roll holder and scrap rewind ensure proper performance with any weight tape.
- Precision serrated cutting blade is easily replaced.
- Weighs 2 1/2 lbs. Max. roll 2" wide, 5 1/2" dia. on 3" core.

929 TRANSFER TAPE DISPENSER

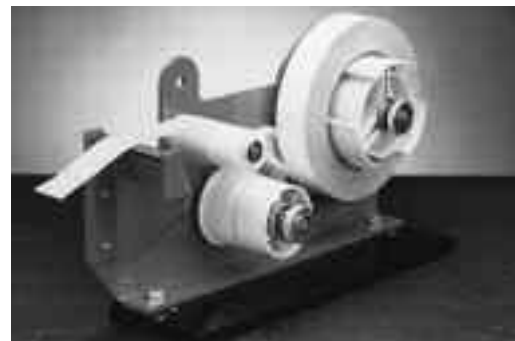

FEATURES:

- Similar to 925, but has trigger control, no cutting blade. For adhesive transfer tape to 1" wide.

926 DOUBLE-FACE BENCH TAPE DISPENSER

FEATURES:

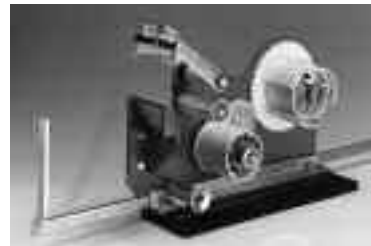

- Dispenses double-sided tape, or other tapes with removable backing strips of PVC or treated paper.
- One easy pull releases the tape and peels off the backing strip, rewinding it on the take-up spool.
- Tape roll holder and scrap rewind spool have independent adjustable brakes, for proper performance with any weight tape.
- Clean cutting tempered steel blade is easily replaced.
- Weighs 8 lbs. 12" long x 3" wide
- Holds rolls to 2" wide, 7 1/4" dia. on standard 3" core.

928 DOUBLE-FACE TAPE DISPENSER

FEATURES:

- Similar construction to 926.
- Equipped with adjustable length stop which makes it easy to measure and dispense repeated lengths of tape.
- Scissors blade facilitates cutting of difficult tapes (aluminum, cloth, tough plastic, etc.)
- Two mounting holes in base for permanent mounting.
- Weighs 10 lbs. 3" wide x 24" long.

351 ELECTRIC LABEL DISPENSER

FEATURES:

- Dispenses pressure sensitive labels of any length, up to 5¼" wide. As a label is taken from the machine, the next label advances automatically.
- Label feed is controlled by photoelectric sensor. Since the label does not touch the sensor, the 351 is especially well suited for dispensing fragile or irregular-shaped labels.
- Control switch has two positions – one for automatic operation, the other feeds continuously as long as the switch is pressed.
- Heavy unobstructed top plate permits stamping or writing on the labels as they are dispensed.

351SW LABEL DISPENSER

FEATURES:

- Identical to 351, but has scrap rewriter to collect carrier sheet as labels are dispensed

SPECIFICATIONS:

- Capacity – Rolls up to 12½" dia. on 1" or 3" core. Fan-fold (computer) labels to 5¼" wide
- Counter Space – 351 - 7" x 14" (18 x 36 cm) / 351SW – 7" x 22" (18 x 56 cm)
- Electrical - 115VAC standard
- Shipping Weight - 351 - 12 lbs (5.5 kgs).

CONVEYOR LINE PRINTERS

POROUS

Conveyor Line Printers automatically print data on moving cartons and other flat surfaced materials with unsurpassed accuracy and legibility. These machines are mounted right on the conveyor line and require no power or operator assistance to print high quality impressions thousands of times a day.

FEATURES:

- Indexing (spot printing) and non-indexing (continuous printing) models with print areas up to 4" x 16.94"
- Field convertible mounting configuration for printing on the top, sides, or bottom of the product.
- Stainless steel mounting columns and shafts for durability even in harsh environments.
- Ribtype die systems allows text information to be set using individual characters or one piece logo dies. Custom dies can also be produced from camera ready copy.

OPTIONAL FEATURES

To eliminate the task of manually re-inking the ink roll, optional Reservoir Roll Covers can be added to the coder. These covers, which are available for all coder models, accommodate our disposable 4 oz. Reservoir Ink Cartridges. When the ink capacity of the roll is depleted, the roll can be re-inked automatically during production by installing one of the disposable 4oz. reservoir ink cartridges. Simply add the appropriate size roll cover and a 4 oz. disposable ink cartridge and the ink roll will be automatically re-inked during the printing operation. The Reservoir Inking Systems feeds only when the machine is actively printing.

NON-POROUS

The non-porous conveyor line printer provides the ultimate in low maintenance printing on all types of non-porous materials.

The non-porous conveyor line printers are the largest of our non-porous coders featuring an 18" circumference print drum. Models are available with 1" and 2" print widths in both indexing and non-indexing styles. Top mount configurations are used for printing on horizontal surfaces such as continuous web materials and side mount configurations are used primarily for printing on the sides of cartons or other vertical surfaces. These coders are ideal for printing on plastic, metal, rubber, glass, waxed or varnished cartons.

The non-porous inking system prevents solvent evaporation from the ink roll and enables the use of inks that dry as fast as 2 seconds at 75 degree Fahrenheit ambient temperatures.

The inking system on these coders is completely enclosed to prevent solvent evaporation. When the ink capacity of the roll is depleted, the roll can be re-inked automatically during production by installing one of the disposable 4 oz. reservoir ink cartridges.

FEATURES:

- Aluminum housings
- Stainless steel columns and shaft
- Mounting brackets and ribtype print drums are standard equipment.
- An optional 4 oz. disposable Reservoir Ink Cartridge is used to recharge the ink roll automatically on demand during the printing operation

(Shown with optional 4oz. Disposable Cartridge)

MINI-CODERS

POROUS

Mini-Coders are recommended for applications which require printing a small amount of code data on cartons or other flat surface materials. The unique inverted design enables the non-indexing Mini-Coders to print within 1/2" of the conveyor belt (with 1 1/8" of the conveyor belt with indexing models).

FEATURES:

- Sealed ball bearings for smooth print drum rotation.
- Precision ground stainless steel mounting columns for corrosion resistance and ease of adjustment
- Re-inkable Microcell rollers that last up to one year with daily use.
- Mount on the left or right side of conveyor line without conversion.
- Reservoir inking system applies ink to roll on demand, not a gravity feed system.
- When the ink capacity of the roll is depleted, the roll can be re-inked automatically during production by installing one of the optional disposable 4oz. reservoir ink cartridges.

The optional Reservoir Ink Cartridge plugs right into the Mini-Coder for convenient, automatic re-inking of the ink roll during production. Standard models are supplied with a dry Microcell ink roll and an anodized aluminum mounting bracket. XF Neoprene ink rolls are optional.

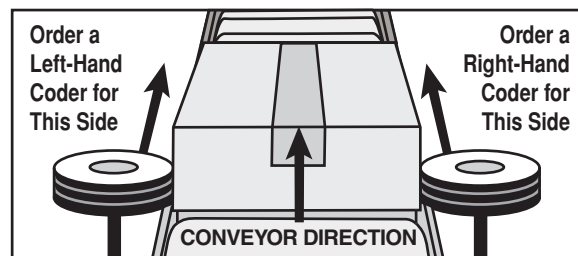

NON-POROUS

Marsh Shipping Supply offers a breakthrough in non-porous coding technology. Unmatched in quality and performance, the patented non-porous inking systems design completely eliminated the problems associated with the use of fast drying inks on non-porous materials like plastics, metal, rubber, glass, varnished and waxed cartons.

FEATURES:

- Consistent, high quality printing on non-porous materials with a drying time as fast as 2 seconds.
- Available in both top mounted styles for web printing and side mounted styles for cartons and other conveyed products.

HAND PRINTERS

POROUS

Hand Printers are designed to provide an efficient, manual method of printing date codes, product IDs, lot numbers or other shipping and handling data. This lightweight hand coder is ideal for use in the shipping room or the warehouse where automatic coding is not possible.

Non-indexing Hand Printers continuously print at repeat intervals equal to the drum circumference. Indexing hand printers have a print drum that returns to the same start position after each rotation allowing for accurate print registration.

These units are designed for use with porous roller coder ink for marking on cardboard and other porous materials.

Stock printers are equipped with ribtype die system and dry microcell roll.

Ribtype dies make changing codes and other data quick and easy, minimizing costly down time.

FEATURES:

- Lightweight anodized aluminum frame.
- Sealed ball bearings for smooth print drum rotation (non-indexing printers).
- Impact resistant plastic handle.
- Re-inkable Microcell roller.
- Eccentric adjustment for ink roll to die face contact.
- Ribtype die system accommodates logo dies and individual characters.

(The porous Hand Printers are not recommended for regular use with alcohol based inks.)

NON-POROUS

Non-porous hand printers fill the requirement for a portable, hand held roll coder designed for marking on metal, plastic, rubber and other materials that require fast drying solvent based inks.

This unit utilizes the unique technology of the patented non-porous inking system. This system effectively prevents the evaporation of solvents from the enclosed ink roll and allows the usage of inks that dry as fast as 2 seconds at 75 degrees Fahrenheit ambient temperatures.

The print drum's cam indexing mechanism provides for accurate print registration on smaller parts or the units can be used in a non-indexing, continuous print mode for printing long lengths of materials such as metal sheets.

The non-porous inking system design utilizes both an ink roll and an engraved anilox roll to apply ink to the rubber printing dies. Both rolls are mounted in tightly sealed aluminum housing which effectively prevents solvent evaporation from the ink roll during use.

These coders are ideal for printing alloy specifications on metal flat bar and sheet materials or printing lot numbers, date codes or product identification information on any flat, non-porous surface. The high quality impressions are both weather proof and fade resistant and can be applied at rates much faster than conventional hand stamping.

The non-porous hand printers are supplied with a re-inkable XF Neoprene Ink Roll. Disposable Type MT Black Ink Rolls are available. Ribtype rubber type and or logo dies are sold separately.

FEATURES:

- Precision machined anodized aluminum construction
- Sealed ball bearings for smooth drum rotation
- Comfortable foam grip handle
- Easily removable print drum simplifies type setting
- Indexing or continuous print without modification

CODER ACCESSORIES & OPTIONS

MARSH®

Marsh Shipping Supply Co., LLC

Non-Repeat Wheel - Permits accurate one-time spot printing of codes (with porous mini or conveyor line coders only) - indexing

Reservoir Inking System – Accommodates ink bottle with roller ball – gravity feed flow. 4 oz. bottle. Continuously re-inks ink roll – no waste, no mess. Allows maximum printing “up-time” with quick and easy bottle change. **Note: Reservoir cover required for conveyor line coders.**

Pre-Inked Rollers – Available for all Coders

CONTACT MARKING

Do you need a quick and economical way to hand mark your shipment: The Marsh Pogo Printers, stencils, and ink can mark up to 100 cartons for very minimal cost-much less expensive than using labels that only mark one box each! Use the inked Pogo Printers and attached stencil for shipment addressing, product identification, even caution symbols! There are also stock and custom die cut stencils that allow you to either choose an already designed stencil for your application, or have Marsh artists customize a special stencil just for you! Deciding to use a Marsh Contact Marking System allows you to hand mark repeatable information for only pennies a shipment.

FEATURES:

- Portable stencil and printer combination can be used anywhere.
- Available with the standard Pogo printer for flat surfaces, or with the Rocker Printer for curved surfaces.
- Ink is distributed evenly through the multi-layered Pogo print pad –no excess waste or mess.
- Unique stencils made from “tea bag” material and treated with paraffin and special oils for clear, easy marking.
- A single stencil can mark up to 100 or more cartons.
- Both porous and non-porous contact marking systems and ink available. Porous printers come with a 4 oz. bottle of ink. **For non-porous printers order the printer and ink separately.**
- Custom constructions available for your specific needs.

CONTACT MARKING STENCIL TISSUE TYPES -

- | | |
|---------------|--|
| B... | Heavy duty and long lasting! This popular stencil is glued to a hard backing sheet that is perforated for easy removal after imaging. Especially good for documents prepared on a typewriter or by hand in the shipping room. |
| Y... | A yellow tissue stencil with a carbon interleaf and taped backing sheet. This stencil is useful whenever a top-taped stencil is required. |
| C... | The green carbon-coated, taped-back stencil requires less pressure to image than a B stencil, making it perfect for tabbing with continuous computer forms. The C Stencil can be removed and reattached to shipping orders and other business forms. Also durable enough for typewriter or hand imaging. |
| CFY... | A yellow tissue with carbon interleaf. The CFY stencil saves time and money by automating your shipment addressing. CFY stencils are available either glued or taped, and can be pulled from the backing sheet without disturbing the remaining stencils. |

CONTACT MARKING PRINTERS

Press Address Kit - These kits include everything you need to get started. Pogo Printer, 500 Blue Stencils, and 4 oz. bottle of black, porous ink

Continuous-form stencil on a pin-fed liner.

CONTACT MARKING INK

Special inks have been designed for use with the Contact Marking Systems. CM1 is a porous ink for marking on surfaces such as cardboard, paper, or wood. CM75 will mark on all non-porous surfaces.

Using these special contact marking inks ensures that you will be getting the highest quality mark possible.

ITEM CODE	DESCRIPTION

INK SELECTION CHART

Use this Ink Selection Chart to determine which ink will be the best for your application surface. Find your surface in the left column, then move to the right to see which Marsh inks will give you the best mark on that surface.

Next, turn to the Ink Information chart on page 26 for information regarding available ink colors, solvents for cleanup and other ink details.

MARSH MARKERS

M88 MARKER – Dye

- Most economical valve action marker – contains more ink than most disposable markers
- Comes with long lasting fiber tip.
- Dye type markers make bold, fast drying, waterproof marks on wood, cardboard, and other porous or non-porous surfaces

M88FX MARKER – Pigmented

- FX Pigmented markers are recommended for heavy duty outdoor use, marking permanent, weatherproof, fast drying opaque markers –
 - Free of xylene
 - HAPS Free (Hazardous air pollutants)
 - Alcohol based
 - Prop 65 compliant

99 MARKER

- Great alternative to throw-away markers
- Industrial valve action marker
- Valve action tip prevents ink dry out; eliminates wasted ink
- Saves time! Easy refill barrel holds large quantity of T-Pigment grade inks. K inks may be used.
- Chisel and round tips available

X10 MARKER

- Large capillary disposable marker is available in black and red
- Marks on any surface
- Wide tip produces bolder, broader marks
- Marks are fast drying and water resistant

AVAILABLE OPTIONS & ACCESSORIES:

- Replaceable tips for 88 and 99 markers
